

PACE Organization Resources

Solutions for Developing and Implementing a PACE Program

HMA is ready to implement program improvement solutions for clinical services, customer outreach and experience, claims, risk adjustment, reporting, and other core functions.

The Support You Need

Having led managed care organizations, delivery systems, and federal and state public health programs, the HMA team of multidisciplinary experts is skilled in PACE program strategy, growth, and operations. We have direct experience working with PACE organizations in policy, application processes, and operational

PACE Feasibility and Planning

HMA's team of experienced PACE experts can help organizations strategically identify, plan, and implement the development of a new PACE. HMA's experts are experienced in leading an organization through the strategic planning processes educating and orientating an interested sponsor organization in their PACE market of interest, and all of the variables, including the desired PACE service areas, federal and state waivers and licensure requirements, and restrictions, the state, and federal application timelines and processes, and pre and post-implementation processes and as well as ongoing business operations.

Organizational Readiness

As PACE organizations look to increase participation in new and existing service areas, HMA can assist organizations with market

and support the development of state and federal PACE program applications. Backed by a powerful combination of multidisciplinary clinical and technical experts, HMA is structured to expedite the strategic planning process, stand up new PACE organizations, and identify and solve current operational limitations.

HMA's team of experts can help organizations
